PROJECTS

Personal Portfolio

- A personal portfolio that provides information on my skills, qualifications, education, talent, and experiences. It provides insight into my personality and work ethic. It is purely a front-end-based project which is designed and built by React.js, Sass, Framer-motion, etc.

Dictionary App with API

- It is an application where we can find words of 12 languages along with the voice. This project is an API-based project. For the smooth and rich user experience React and material-ui is used in this project. It has dark and light mode themes both.

Color Picker App

- It is an app to pick a random color in both hexadecimal and in text format with a click.

Word Beater Game with JavaScript

- This is a small game made with JavaScript which have different levels and a scorecard for your score.

Internet Banking System

- Worked as front-end designer in this project. Internet Banking System is an application where we can transfer, withdraw and deposit money
